

2007 was a banner year with Maverick riders reaching the podium in numerous Super D, Short Track, Cross Country and Downhill events, demonstrating the versatility of the MonoLink suspension and Maverick DUC forks.

Maverick pro Mike West lead the way on his ML8 with five first-place Super D finishes and the Best All-Around Rider award in the Mountain States Cup.

2008 Frames -

The benchmark 6.5" travel **ML8** is now offered in the classic hard anodized gray finish as well as two new colors: Burnt Orange and Limited-Edition White. For 2008, the ML8 will continue to lead in the long travel all-mountain category that Maverick has helped pioneer since 2005.

The 2008 **Durance** frame with its stiffer frame design and added travel sits perfectly in the "all mountain" category of 5.5 inch travel frames. The new oversize diameter ovalized top and stiffer seat tube, give this bike a point-and-shoot attitude. The added travel over the 2007 Durance still has a snappy efficient XC style ride, but with downhill prowess approaching our venerable ML8. The Durance will be offered in three colors: Hard Ano Gray, Fast Blue and Limited-Edition Fast Red.

The new 5" travel **Matic** is the classic all-around XC Maverick, now with a concave seat/top tube gusset and available in two colors: Matic Blue and Ale Brown.

Component Kits -

Maverick frames are available with a choice for four build kits, ranging from Shimano LX/Avid X-7 basic level to Shimano XTR/Avid Ultimate performance-grade componentry. For 2008, Maverick build kits will be available with SC32 and DUC32 forks or select Rock Shox forks.

Forks -

The classic 6" travel DUC32 and 4.7" SC32 forks will be offered in both standard 26" and 29er versions.

Our new model is the DUC36CF, a 165mm travel all-around fork featuring an ultra-stiff carbon fiber "H" section, 36mm stanchions and the patented "QuickFlip" axle retention system.

Projected availability: summer 2008.
